Task 1: Basic Banking System

- Create a simple dynamic website which has the following steps
- Start with creating a dummy data in database for upto 10 customers. Database options: MySQL, Mongo, Postgred, etc.
- Customers table will have basic field, such as name, email, current balance, etc.
- Transfers table will record all the transfers happened.
- Flow: Home page> View all customers> Select and view one customer> Transfer money> select customer to transfer to> view all customers.
